## Ruthman... Another Word for Innovation

reliable industrial pump.

In 1924, with the conception of the first vertical ball bearing sealless centrifugal pump, Ruthman Pump and Engineering furthered the design on a unit with a one piece motor driven shaft. The pump was called "Gusher", giving birth to the trade name Gusher Pumps, and the coining of the term "coolant pump".

Wanting to carry on the tradition of quality and reliability started by his father, Thomas R. Ruthman joined the company in 1949. In the early 1990's Thomas R. Ruthman's son, Thomas G. Ruthman joined the company, continuing this same tradition. Maintaining the reputation of Gusher Pumps by innovation and customer service, the company has grown to service companies worldwide.

It began in 1913, servicing mechanical components of the steamboats on the Ohio River. The company founder, Alois Ruthman, was a man of vision and saw part of the future of the company was in the development of a

# SEV Series

Gusher Industrial Vertical End Suction Pumps are designed to be reliable and versatile. Their heavy duty one piece shaft construction has no seals, bushings, or metal to metal contact below the mounting plate, assuring a long, maintenance free life. The pump design has been used in many different applications including industrial washing machines, cooling towers, spray booths, and part cleaners.
