Interchangeability
with the Gusher
7800 AVD models
for your system's
requirements.

The Gusher Chopperator Pump...Proven Performance.

Here at the Gusher testing facility, some of the most extremely system-clogging foreign materials are introduced into the *Chopperator* pump's intake.

These materials are automatically broken down to manageable size before entering and are then able to easily flow through the entire pump system.

Contact Gusher for more information about the *Chopperator* Pump.
